

# Automated Commercial Environment—Requirements Recommendation

|                          |   |
|--------------------------|---|
| <b>Date:</b>             | 7/11/01 Draft                           |
| <b>Number:</b>           | ENT-013                                 |
| <b>Requestor:</b>        | Entry Process Subcommittee <sup>1</sup> |
| <b>Customs Co-Chair:</b> | Phyllis Rubenstein, Millie Gleason      |
| <b>Trade Co-Chair:</b>   | Art Litman                              |

## Requirement

ACE must have ability to make multiple corrections to the original entry.

## Business Need

There will be occasions on which a broker may make an error on an entry, or discover that an importer's documentation was erroneous, and need to submit a correction. On the same entry, an importer may also discover a discrepancy in the container load vs. what was invoiced, requiring another correction. These and other situations are relatively common business occurrences and should be provided for in ACE correction utilities.

## Technical Need

## Benefits

By providing for electronic corrections for multiple issues, brokers will be able to correct information far more quickly, and Customs will remove itself completely from the current manual processing of such corrections that is extremely unpopular with the personnel that are required to deal with them.

## Risks
